Profile

Third-year Computer Science student at the University of Cyprus with a 9.01/10 GPA. Co-founder and CTO of Argos Robotics, where I work on computer vision and navigation for an autonomous construction-site robot, alongside personal projects in neural networks, optimization, graphics and API design. I always aim for a deep understanding of what I'm working with, not just a working result, and I'm looking to grow these skills, and others beyond them, in a professional setting.

Experience

Present

Co-founder and Chief Technology Officer

Argos Robotics

- Co-founded a team of three building Loaden, an autonomous assistant that follows workers around construction sites and carries their tools and materials.
- Developed the computer vision for pathfinding with a depth camera in the Python based MVP.

Ongoing

Personal & University Projects

Neural networks, optimization, graphics, computer vision and API design

See the Projects page: alexmoysi01.github.io/?view=projects

Education

2024 – 2028	Computer Science University of Cyprus • Current GPA: 9.01 / 10
-------------	--

Achievements

2026	JASStartup Cyprus Finalist With Argos Robotics
------	--

2022 – 2023	CCNAv7 certified; first round, Cyprus Informatics Olympiad
-------------	---

Skills

Programming	C, C++, Java, Python, Rust, SQL
Tools	Git, OpenGL
Areas	Computer vision, robotics, optimization, graphics, machine learning
Languages	Greek (native), English (fluent), German and Swiss German (semi-native)

Outside of CS: I played double bass in the national youth orchestra, then clarinet in the ΣΜΕΦ military band. I now play clarinet, bass and classical/electric guitar, and perform with a band of friends. I'm also currently learning Japanese.
